NOTE TO USER

This index, which is the third in the series, is for the ten volumes XXI to XXX each consisting of two numbers. The index covers the eleven years 1947–57 inclusive. The years of publication are as follows:

1947. XXI, no. 1 (pp. 1 to 136);
1948. XXI, no. 2 (pp. 137 onwards), and XXII, no. 1 (pp. 1 to 144);
1949. XXII, no. 2 (pp. 145 onwards), and XXIII, no. 1 (pp. 1 to 68);
1950. XXIII, no. 2 (pp. 69 onwards);
1951. XXIV;
1952. XXV;
1953. XXVI;
1954. XXVII;
1955. XXVIII;
1956. XXIX;
1957. XXX.

The index is in three parts: Subjects; Authors (and Titles); and Reviewers.

Throughout the index the subjects or titles of original papers are printed in roman type. Those of reviews or notices are printed in italic type.

In the Subject index, items have as far as practicable been grouped under subject headings. A list of these headings is given on page 4. To aid reference to the Authors index for details of authorship and title, the author's surname has been placed in brackets after each item in this index.

In the Authors index, to distinguish reviews from notices, the reviewer's surname follows the title of the book reviewed in brackets.

In the Reviewers index the author's surname will be found in brackets after each item.

In 1947 and 1948, about eighty items from *Forestry Abstracts* were included as notices in XXI and in XXII by arrangement with the Commonwealth Forestry Bureau at Oxford. These will be found at pages 127–36 and 247–56 in XXI and at pages 132–44 in XXII. For inclusion in the index, a selection of about twenty has been made. These items are distinguished in the index by an asterisk.

The three parts of the index will be found as follows:

Subjects: pp. 5–18.
Authors (and Titles): pp. 19–29.
Reviewers: pp. 30–32.

It must be emphasized that when exact titles of papers or of books are required, the Authors index must be consulted. Elsewhere titles may be shortened or paraphrased.

ACKNOWLEDGEMENTS

The index has been compiled by the Editor, using the two earlier indexes as guides.

Within the limitations set by space, an effort has been made, as before, to develop the Subject index, and in this respect considerable advice and help has been received from Mr. G. D. Kitchingman, Librarian at the Forest Research Station, Alice Holt; from Mr. Hillman also of Alice Holt; from the Clarendon Press; from The Commonwealth Forestry Bureau; from Dr. Chalk; and from Messrs. Edlin, McNeill, Rendle, and Professor Steven who examined the Subject Index in draft.

The Society desires to express its thanks to all the above.
